EDUCATION

MBM University

B.E. in Computer Science

CGPA 7.9

Jodhpur, Rajasthan

Aug 2023 - May 2027

Course Highlights Operating Systems, Computer Networks, Software Engineering, Advanced Machine Learning, Computer Organization & Architecture etc.

EXPERIENCE

Indian Institute of Technology (IIT - Jodhpur)

ML Researcher (Internship)

Jodhpur, Rajasthan

June 2026 - July 2026

- Designed and optimized a **multilingual script identification pipeline** using PyTorch, OpenCV, EfficientNet V2 and custom preprocessing for 12 Indic scripts, achieving **90.31%** accuracy and **outperforming the published benchmark by 4 to 5%** on the same evaluation protocol.
- Performed extensive ablation studies on **network architecture, feature fusion, training strategies, data augmentation and hyperparameter tuning** to quantify their impact on model robustness, generalization and classification performance.

Havells (Head Office)

Software Engineer (Internship)

Noida, Uttar Pradesh

June 2025 - July 2025

- Developed and deployed an **Automated Number Plate Recognition (ANPR) system** using **Python & OpenCV**, processing **200+ trucks/day** across 5+ entry points with **95%+ accuracy**.
- Developed and deployed a **24/7 operational system** integrated with Havells' official **SAP database** for centralized, real-time data logging.
- Implemented temporary images storage for number plate captures, retaining data for **up to 5 days** to ensure traceability and auditability.

PROJECTS

TharDelight ([Deployment](#))

June 2026 - July 2026

- Architected a high-performance e-commerce platform using **Next.js, PostgreSQL and Prisma ORM**, leveraging **multi-layer caching (Cache-Aside, Write-Through, Write-Back, SWR)** and query optimisation to **minimise latency and maximise throughput** under concurrent workloads.
- Engineered **ACID-compliant order and inventory workflows** using **PostgreSQL transactions, row-level locking, and atomic operations**, preventing race conditions, deadlocks, and overselling while ensuring strong consistency and fault-tolerant request processing.

ResultJano ([Source Code](#))

Nov 2025 - Dec 2025

- Built a backend **automation** using **CommonJS, headless Selenium, and MySQL** to bulk download and merge **200+ PDFs per run** from roll-number ranges.
- Dockerized** background execution. Cutting manual effort by **~90%**.

TECHNICAL SKILLS

- Languages: C++ (Proficient), Python (Advanced), JavaScript/ES6, SQL (MySQL, PostgreSQL)
- Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, FastAPI, Flask, REST APIs, Tailwind CSS, TensorFlow, PyTorch, scikit-learn, OpenCV, MediaPipe, Prisma ORM
- Tools & Platforms: Git, GitHub, Linux/Unix, Docker, Kaggle, Selenium, Puppeteer, Streamlit

ACHIEVEMENTS

- Lead – Google Developer Groups (GDG) MBM University, Jodhpur:** Led core teams, mentored peers, and delivered impactful developer programs.
- GATE 2026 (CS): AIR 3353, Score 593, ~98.4 percentile** among 2,11,020 candidates.
- Head Coordinator, Embedded Systems & Robotics Club:** Led a 45-day Robotics & Embedded Systems Summer Workshop.
